GARDENA smart system

1 GARDENA smart App

With the free GARDENA smart App for iOS and Android, staying in touch with your garden is at your fingertips. Mowing the lawn and watering has never been so convenient. The app features an intuitive user interface. Mowing the lawn is therefore child’s play and watering the plants happens when they need it; both tasks can be coordinated or controlled remotely whenever you want.

This means that the app offers a wide range of useful features. Here is a selection:*

* Similar to the illustration

Getting started

It is so simple to get the GARDENA smart system up and running. The app will automatically lead you through a step-by-step guide. The system can be installed on any device, and all it takes are a few simple steps.

My Garden

The intuitive GARDENA smart App shows an overview of all measurements taken by the smart Sensor. Feel safe in the knowledge that your plants are in good hands. At the same time, you can see an overview of all your smart devices and their status, and take control at any time if necessary.

Schedules

The days of the week and times can be programmed separately for each smart system device. Your schedules can be easily copied and edited, and all scheduled times are displayed in an overview. You can also set priorities for the products such as stopping the robotic lawnmower just before the sprinkler system starts.

All of the app functions will be continually expanded – please see www.gardena.com

2 smart Gateway

The heart of the smart system for wireless network communication.

- Should be placed indoors
- Simple step-by-step instructions for connecting your Internet router with the network, via Wi-Fi or LAN cable
- Stable, secure connection of all smart products with safe and proven wireless technology
- Extensive coverage thanks to integrated high-performance antennas

smart mowing

3 smart SILENO

Fully automated, reliable, stripe-free and even mowing of lawns up to 1000 m², even for large and complex areas, with the GARDENA smart App.

- **Surface capacity** – 1000 m²
- **Slopes** – up to 35 % with the same mowing results
- **Works quietly** – 60 dB(A), so it will not disturb you or your neighbours
- **Reliable and durable** – modern Lithium-ion battery technology
- **EasyPassage** – the Robotic Lawnmower independently detects and masters narrow corridors – with no extra programming
- **Securely connected** – Stable, wireless network with secure wireless technology

smart SILENO Set

Never mow again!

smart irrigation

4 smart Sensor

Delivers key information regarding irrigation controller settings via the GARDENA smart App, helping you to create a beautiful garden.

- **Stay connected** – powerful antenna guarantees wireless connection to the Gateway – even in large gardens
- **Reliable** – works with various soil textures
- **Local weather station for plants** – measures temperature and light intensity
- **Digital root** – measures the soil moisture where it matters most – at the root of the plant

5 smart Water Control

Irrigation times can be flexibly set and adjusted as required at any time using the GARDENA smart App.

- **Stay connected** – powerful antenna guarantees wireless connection to the Gateway – even in large gardens
- **Know what is going on** – LEDs show the status on demand
- **Reliable** – thanks to proven GARDENA valve technology
- **Direct control** – simply press the button if water is needed immediately
- **Frost alarm** – warns you before it is too cold to operate the Water Controls

smart Sensor Control Set

Needs-based and efficient irrigation of plants.
