GARDENA Water Computer MultiControl duo

Translation of the original instructions from German.

Please read these operating instructions carefully and observe the information they contain. Use these operating instructions to familiarise yourself with the product, the proper use and the safety instructions.

For safety reasons, children and young people under the age of 16, as well as people not familiar with these operating instructions, should not use this product.

Persons with reduced physical or mental abilities may use the product only if they are supervised or instructed by a responsible person. Children must be supervised to ensure that they do not play with the product. Never operate the product when you are tired, ill or under the influence of alcohol, drugs or medicine.

→ Please keep these operating instructions in a safe place.

1. Where to Use Your GARDENA Water Computer

Intended use:

The GARDENA Water Computer is intended for private use in domestic and hobby gardens, exclusively for outdoor use, to control sprinklers and watering systems. The Water Computer has two separate outlets and can be used e.g. for automatic irrigation during your holiday.

Please note:

The GARDENA Water Computer must not be used for industrial purposes or in conjunction with chemicals, foodstuffs, easily flammable and explosive materials.

2. Safety Instructions

Battery:

To ensure the Water Computer runs safely, only a 9V alkaline manganese battery (alkaline) type IEC 6LR61 must be used.

In order to stop the Water Computer from failing because of a weak battery if you are away for a long time, the battery must be replaced when the battery display still shows only 1 bar.

Setting up

Warning!

The Water Computer must not be used indoors.

→ Only use the Water Computer outdoors.

The Water Computer may only be set up vertically with the sleeve nut to the top to prevent water penetrating into the battery compartment.

The minimum water output to ensure correct functioning of the Water Computer is 20 – 30 l/h per outlet. E.g. for controlling the Micro-Drip System, at least 10 pieces 2-litre Drip Heads are required.

At high temperatures (over 60 °C at the display) the LCD display may extinguish. This does not affect the program in any way. When the computer cools down the LCD display illuminates again.

The max. temperature for the water flow is 40 °C.

→ Only use clear fresh water.

The minimum operating pressure is 0.5 bar, the maximum operating pressure is 12 bar.

Avoid tensile strain.

→ Do not pull the hose connected to the Water Computer.

Programming

→ Program the Water Computer with the tap turned off.

In this way, you can prevent unintentional water penetration.

You can remove the control unit from the housing to program the Water Computer.

If the controller is removed when the valve is open, the valve remains open until the controller is fitted again.

Warning!

This machine produces an electromagnetical field during operation. This field may under some circumstances interfere with active or passive medical implants. To reduce the risk of serious or fatal injury, we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this machine.

Danger!

Small parts could be swallowed during assembly and there is a risk of suffocation from the polybag. Keep infants away during assembly.

3. Function

With the Water Computer, the garden can be watered fully automatically up to 3 times a day (every 8 hours) via both outlets. Sprinklers, a sprinkler system or a drip head watering system can be used for watering.

The Water Computer carries out watering fully automatically according to the set program and can therefore also be used during holidays. Early in the morning or late in the evening, evaporation and therefore water consumption is lowest.

Controls :

The watering programme is easily entered using the controls.

Control

- ① **Man. button**
- ② **OK-Taste**
- ③ **Menu button**
- ④ **▼-▲ buttons (V1/V2)**

Function

- For switching the water throughput on or off manually.
- Applies the values set with the ▼-▲ buttons.
- Changes to the next programme level.
- Change the adjustable values in each level/selection of outlet (V1/V2) in Level 1.

Display levels :

The 6 display levels can be selected one after the other by pressing the **Menu** key.

- Level 1: **Normal display**
- Level 2: **Current time and day of the week**
- Level 3: **Watering start time**
- Level 4: **Watering duration**
- Level 5: **Watering frequency**
- Level 6: **Switch programme on or off / Deactivate sensor**

Display messages:

The display level can be changed at any time by pressing the **Menu** button. All programme data changed up to this time and confirmed with the **OK** button is saved. If data is changed during programmed irrigation and confirmed with the **OK** button then the valve is closed.

Display	Description
⑤ Weekdays Mo, Tu, ...	Current weekday <input type="checkbox"/> or programmed watering days ☀.
⑥ Time	Current time of day (flashes when in input mode).
⑦ am / pm	Display for 12-hour clock (e.g. in USA, Canada).
⑧ Start	Watering start time (flashes when in input mode).
⑨ Run Time	Watering duration (flashes when in input mode).
⑩ 8h, 12h, 24h, 2nd, 3rd, 7th	Watering cycle (with <input type="checkbox"/> activated). Every 8 / 12 / 24 hours; every 2nd / 3rd / 7th day.
⑪ Prog ON / OFF	Watering programme on (ON) / off (OFF).
⑫ Direct sensor control	Watering is automatically controlled between 20:00 and 06:00 via the Soil Moisture Sensor.
⑬ Sensor 1 / 2 dry / wet	Dry sensor dry : watering is carried out. Wet sensor wet : watering is not carried out.
⑭ Valve ← V1 / Valve V2 →	The arrow indicates the selected valve: - displayed ☀: the valve is connected - flashing ☀: the valve is open
⑮ Battery	Indicates 5 battery levels: 3 bars: Battery fully charged 2 bars: Battery half full 1 bar: Battery low 0 bar: Battery almost flat Frame is flashing: Battery flat

If the battery frame is flashing, the valve is no longer opened. **A valve opened by the programme will also close again if the battery is flat.** The battery display is reset when the battery is changed.

2 Bars	1 Bar	0 Bar	Frame is flashing
Battery half full	Battery low	Battery almost flat	Battery flat
Valve opens.	Valve opens.	Valve still opens.	Valve does not open.
The Water Computer is guaranteed to work for a minimum of 4 more weeks.	The Water Computer will continue to work for no more than 4 weeks.	The Water Computer stops working soon.	The Water Computer stops working.
	It is advisable to change the battery.	The battery must be changed soon.	The battery must be changed.
	→ Replace battery (see 4. Initial Operation "Inserting battery").		

4. Initial Operation

Insert battery:

The Water Computer must only be operated with a 9 V alkali-manganese (alkaline) battery type IEC 6LR61.

1. Remove controller ⑯ from the housing of the Water Computer.
2. Insert battery in the battery compartment ⑰. **Observe correct polarity P.** *The display shows all the LCD-symbols for 2 seconds and then moves to the time/day of week level.*
3. Install controller ⑯ on the housing again.

Set display to 24-hours or 12-hours (am/pm):

The factory setting is the 24-hour display.

→ Press the **Man.** button continuously while inserting the battery.

Connect soil moisture or rain sensor (optional):

The Water Computer is fitted with a sleeve nut ⑱ for taps with (G 1") (33.3 mm) thread. The adaptor supplied ⑲ allows the Water Computer to be connected to taps with a (G 3/4") thread (26.5 mm).

1. **For tap with a G 3/4" (26.5 mm) thread:**
Screw adaptor ⑲ on to the tap manually (do not use pliers).
2. Screw sleeve nut ⑱ of the Water Computer on to the adaptor thread by hand (do not use pliers).
3. Screw Tap Connectors ⑳ onto the two Water Computer outlets.

Connect Soil Moisture Sensor or Rain Sensor (optional):

2.

3.

Fit anti-theft device (optional):

In the case of rain, or when the soil is sufficiently moist, a programmed, automatic watering programme will be stopped or prevented from starting. Manual operation is possible at all times.

Sensor assignment:

- a) A sensor in Connector 1 : Sensor only applies to Valve 1
- b) A sensor in Connector 2 : Sensor applies to both valves
- c) Sensor in Connectors 1 and 2 : Sensor 1 applies to Valve 1
Sensor 2 applies to Valve 2

1. Place Soil Moisture Sensor in watered area
– or –
place Rain Sensor **outside** of the watered area.
2. Remove controller (16) from the housing of the Water Computer.
3. If necessary, connect sensor to Extension Cable or Adaptor at the sensor connection (21) of the Water Computer.

Activate sensor:

A sensor will be automatically activated after 60 sec. The sensor assignment (a), (b) or (c) (arrow) and the current sensor status **dry / wet** will be displayed.

E.g. Sensor 1 **dry** (dry) Valve 1 (a) only.

Deactivate sensor [Level 6]:

If watering is to be without a sensor, although a sensor was previously activated, then this sensor must be deactivated.

1. Remove sensor from Water Computer.
2. Press **Menu** button 5 times **[Level 6]**.
*The sensor assignment (a), (b) or (c) (arrow) and the current sensor status **dry / wet** will be displayed.*
3. Press **OK** button.
The sensor has been deactivated.

To connect older sensors (with 2-pin connector), the **GARDENA Adapter Cable 1189-00.600.45** is required, which can be procured from GARDENA Service.

To secure your Water Computer against theft, you can obtain the **GARDENA Anti-theft device Art. No. 1815-00.791.00** from GARDENA Service.

1. Screw clamp (22) with screw (23) firmly to the back of the Water Computer.
2. Use clamp (22) e.g. for fixing a chain.

It is no longer possible to remove the screw after it has been screwed in.

5. Programming

Set current time and day of week:

[Level 2]

To set the programme, the controller can be removed and mobile programming can be carried out (see 4. Initial Operation “Inserting battery”).

Programming can be discontinued at any time by pressing the **Man.** button. All programme data changed up to this time and confirmed with the **OK** button is saved.

1. Press **Menu-key [Level 2]** (not necessary if the battery has just been inserted).
The hours display and Time flash.
2. Set the time in hours with the **▼-▲** button (example: **9** hours) and confirm with the **OK**-key.
Time and the minutes display flash.
3. Set the time in minutes with the **▼-▲** button (example: **30** minutes) and confirm with the **OK**-key.
Time and the day of the week display flash.
4. Set day of week with the **▼-▲** buttons (e.g. **(Tu)**) and confirm with the **OK** button.
The display moves to the message “Entering watering programme” of the watering mode “Scheduled watering” [Level 3].
Start Prog and the hours will flash on the display.

Watering modes:

The Water Computer has 3 watering modes:

A) Scheduled watering:

With the “scheduled watering”, watering begins as per the set programme. There is the additional option to consider soil moisture or rain in the watering programme. In the case of rain or sufficiently moist soil, the programme’s stop is activated or activation of the programme is prevented. Manual watering **Man. + OK** is still possible.

B) Direct sensor control):

With “direct sensor control”, watering is exclusively controlled in dependency on soil moisture between 20:00 and 06:00, if the sensor has indicated **dry**. 1 or 2 Soil Moisture Sensors can be connected.

C) Manual watering:

With “Manual watering”, watering begins immediately after **Man. + OK** has been pressed and can be operated independently of the sensor status.

Entering watering programme:

[Level 3]

[Level 4]

[Level 5]

A) Scheduled watering:

- Select programme for Valve 1 (← V1) or Valve 2 (V2 →) with the ▼-▲ buttons (V1/V2), (not possible if the current time of day and weekday have been previously entered).
- Press **Menu**-key twice [Level 3] (not necessary if the current time and day of the week has been entered).
Start Prog and the hours section flash on the display.
- Set the watering start time hours with the ▼-▲ button (E.g. 6) and confirm with the **OK**-key.
Start Prog and the minute display flashes on the screen.
- Set the minutes for starting the watering time with the ▼-▲ button (example: 20 minutes) and confirm with the **OK**-key.
Run Time and the hours for the watering time flash on the display.
- Set the hours for the watering time with the ▼-▲ button (example: 0 hours) and confirm with the **OK**-key.
Run Time and minutes for the watering time flash on the display.
- Set watering time minutes with the ▼-▲ button (example: 10 minutes) and confirm with the **OK**-key.
Watering cycle flashes on the display.

The watering frequency can be selected by:

- the (7.) watering cycle (right hand column of the display) – or –
- the (8.) watering days (left hand column of the display).

- Select **watering cycle** with the ▼-▲ button (E.g. 2nd) and confirm by pressing **OK**.

8h / 12h / 24h: Watering every 8 / 12 / 24 hours
2nd / 3rd / 7th: Watering every 2nd / 3rd / 7th day

The display jumps to the watering programme on the screen.

– or –

- Select each watering day with the ▼-▲ button (E.g. ☀ Mo, ☀ Fr Monday and Friday) and confirm by pressing **OK**. Press the **Menu** button.

Display moves to the message “Activate /deactivate watering programme” [Level 6].

If the following day is not a watering day, then watering only takes place until 0:00.

(Ex. watering days = Monday, Tuesday, Friday; Start time = 23:00; Water duration = 2h.
On Monday, watering takes place from 23:00 until Tuesday 01:00.
On Tuesday and Friday, watering takes place from 23:00 until 0:00.)

Activate /deactivate watering programme:

[Level 6]

The **Prog ON** must be selected so that the watering programme can start. With **Prog OFF** automatic watering is deactivated. **Prog ON / OFF** can be independently selected for each valve. Also with **Prog OFF** manual watering is possible.

1. Select Valve 1 (↔ **V1**) or Valve 2 (**V2** ↔) with the ▼-▲ button (**V1/V2**) (if a programme was previously created then the valve cannot be selected, the corresponding valve is automatically selected).
2. Press **Menu** button 5 times [Level 6] (not necessary if a programme was previously created).
3. Select **Prog ON** or **Prog OFF** with the ▼-▲ buttons and confirm with the **OK** button.

*For 2 sec. **Prog OK** is shown and then the display moves to the **Normal Display** [Level 1].*

Prog ON: The water computer has now been programmed, i.e. the inbuilt valve opens and closes completely automatically and thus waters at the programmed time.

B) Direct sensor control ☾ :

Prerequisite : at least one GARDENA Soil Moisture Sensor is connected (see 4. Initial Operation). Watering nights (20:00 – 06:00), if the sensor registers dry.

A previously set scheduled watering programme is stored but not carried out.

1. Select programme for Valve 1 (↔ **V1**) or Valve 2 (**V2** ↔) with the ▼-▲ buttons (**V1/V2**).

2. Press **Menu** button 3 times.

Run Time and the watering duration flash on the display.

3. Set watering duration hours with the ▼-▲ buttons (e.g. **0** hours) and confirm with the **OK** button.

Run Time and the watering duration minutes flash on the display.

4. Set watering duration minutes with the ▼-▲ buttons (e.g. **10** minutes) and confirm with the **OK** button.

Watering cycle flashes on the display.

5. Select direct sensor control ☾ with the ▼-▲ buttons and confirm with the **OK** button.

After each watering, a 2-hour watering pause is triggered in order for the Soil Moisture Sensor to record the soil moisture.

Example :

Watering duration = 10 minutes

Watering begins when the sensor registers dry (Sensor **dry**) between 20:00 and 06:00, and ends when the sensor registers wet (Sensor **wet**) or after 10 minutes at the latest.

2 hours after the end of watering, if dry is registered (Sensor **dry**), watering is again initiated and with wet (Sensor **wet**) there is no further watering etc. for 2 hours up to max. 06:00. There is no watering between 06:00 and 20:00.

The watering duration is preset at the factory to 30 minutes.

Emergency programme (the moon ☾ : flashes): If no sensor is inserted in the direct sensor control, or the connection cable is faulty, watering will take place every 24 hours. The watering duration depends on the set run time but is limited to a maximum of 30 minutes.

Exit direct sensor control [Level 5]:

1. Press **Menu** button 4 times.
The moon ☾ flashes on the display.
2. Select a different **watering cycle** with the **▼-▲** buttons and confirm with the **OK** button.

Read / modify watering programmes:

If a value in a programme is to be changed, this can be done without changing the other values in the programme.

1. Press the **Menu** key twice.
Start and the hours flash on the display.
2. Press the **Menu** button to jump to the next programme level
– or –
Change programme data with the **▼-▲** buttons and confirm with the **OK** button.

When the watering duration is changed while a program is running, the current watering cycle is ended.

C) Manual watering:

Each valve can be **opened or closed manually at any time.** A program-controlled open valve can also be closed early without changing the program data (watering start time, watering duration and watering frequency). The controller must be fitted.

1. Select Valve 1 (↔ **V1**) or Valve 2 (**V2** ↔) with the **▼-▲** buttons.
2. Press **Man.**-key to open the valve manually (or to close an open valve).

Run Time and the watering time in minutes (set to **30** minutes in the works) flash for 10 seconds on the display.

3.

3. Whilst the watering time in minutes is flashing, the watering duration can be modified with the ▼-▲ button (between 0:00 and 0:59) (example: 10 minutes) and confirm with the OK-key.
4. Press **Man.**-key to close the valve early.
The valve is closed.

The amended manual opening period is stored, i.e. each time the valve is opened manually in future the modified opening period is preset. If the manual opening period is amended to 0:00, the valve is closed and also remains closed after the **Man.**-key is pressed (child lock).

If the valve has been manually opened and a programmed start of watering overlaps with the manual opening duration then the watering programme will not be carried out.

Example :

The valve is **opened at 9.00 a.m. manually**, the opening period is 10 minutes. A program with a **start time between 9.00 and 9.10 a.m.** will not be undertaken in this case.

Reset :

The factory settings are restored.

- Press **Man.**-key and **Menu**-key simultaneously for 3 seconds.
All the LCD symbols are displayed for 2 seconds and the display moves to the normal display.
- All the program data are set to zero.
- The manual watering period is set to 0:30 again.
- The time and day of the week are retained.

Important information :

If no entry is made during programming for a period of more than 60 seconds, the normal display reappears. In this case all changes made up till now will be applied.

If a sensor inserted in the Water Computer registers wet (**wet**), the corresponding programme will not be carried out.

6. Storage

Storage / Overwintering :

1. To preserve the battery, it should be removed (see 4. Initial Operation).
The programmes remain stored. If the battery is inserted again in spring, only the time of day and the weekday must be newly entered.
2. Store controller and valve unit in a dry place where they are protected from frost.

Disposal:
(in accordance with
Directive 2012/19/EU)

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.
→ Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

Disposing of flat batteries:

→ Please return flat batteries to a GARDENA dealer or dispose of them properly at your nearest recycling centre.
Only dispose of batteries when they are **flat**.

7. Maintenance

Clean filter:

The filter 24 should be checked regularly and cleaned when necessary.

1. Unscrew sleeve nut 19 of the Water Computer by hand from the tap thread (do not use pliers).
2. If necessary unscrew the adaptor 18.
3. Remove filter 24 from sleeve nut 19 and clean.
4. Fit the Water Computer again (see 4. Putting Your Water Computer into Operation "Connecting Water Computer").

8. Troubleshooting

Fault	Possible Cause	Remedy
No display appears	Battery inserted incorrectly.	→ Check polarity markings match (+/-).
	Flat battery.	→ Insert new alkaline battery.
	Temperature on the display is higher than 60 °C.	Display appears after temperature has dropped.
Manual watering is not possible using the Man. button	Battery flat (frame is flashing).	→ Insert new alkaline battery.
	Manual watering period is set to 0:00.	→ Set manual watering period to a figure greater than 0:00 (see 5. Programming).
	Tap turned off.	→ Turn tap on.
Watering program is not carried out out (no watering)	Watering program has not been entered completely.	→ Read off watering program and modify if necessary.
	Programs deactivated (Prog. OFF).	→ Activate program (Prog. ON).
	Program entry/modification during or just before the start pulse.	→ Make program entry/modification outside the programmed start times.
	Valve was opened manually previously.	→ Avoid possible program overlaps.
	Tap turned off.	→ Turn tap on.
	Soil moisture or rain sensor registers damp (wet).	→ If dry, check setting/location of soil moisture/rain sensor.

Fault	Possible Cause	Remedy
Watering program is not carried out (no watering)	Battery flat (frame is flashing). Controller is not connected (no display with V1/V2).	→ Insert new alkaline battery. → Mount controller on housing.
Water Computer does not close	Minimum quantity of water drawn is less than 20 l/h.	→ Connect more drip heads.
Symbol direct sensor control is flashing 	Sensor is not correctly connected or not registered.	→ Check Connection Cable and sensor, or activate sensor.
Sensor 1 and/or Sensor 2 is flashing	Sensor is defective.	→ Check Connection Cable and sensor or deactivate sensor.

In the event of other faults please contact GARDENA Service.
Repairs should only be carried out by GARDENA service centres or dealers authorised by GARDENA.

9. Available accessories

GARDENA Soil Moisture Sensor		Art. No. 1188
GARDENA Rain Sensor electronic		Art. No. 1189
GARDENA Anti-theft device		Art. No. 1815-00.791.00 From GARDENA Service
GARDENA Adapter cable	To connect older GARDENA sensors	Art. No. 1189-00.600.45
GARDENA Cable Adapter	For simultaneous connection of Rain- and Soil Moisture Sensor	From GARDENA Service

10. Technical Data

Number of controlled valves:	2
Min./max. operating pressure:	0.5 bar / 12 bar
Flow medium:	Clear fresh water
Max. liquid temperature:	40 °C
Temperature area:	5 °C to 60 °C
Number of program-controlled watering cycles per valve and day:	3 x (every 8 hrs.), 2 x (every 12 hrs.), 1 x (every 24 hrs.)
Number of program-controlled watering cycles per valve and week:	Every day, every 2, 3 or 7 days; or individual selection of weekdays
Watering duration:	1 min. to 3 hours 59 min.
Battery required:	1 x 9V alkaline manganese alkaline battery type IEC 6LR61
Operating time of the battery:	approx. 1 year

11. Service / Warranty

Service :

Please contact the address on the back page.

Warranty :

In the event of a warranty claim, no charge is levied to you for the services provided.

GARDENA Manufacturing GmbH offers a two-year warranty (effective as of the date of purchase) for this product. This warranty includes all significant defects of the product that can be proved to be material or manufacturing faults.

This warranty is fulfilled by supplying a fully functional replacement product or by repairing the faulty product sent to us free of charge; we reserve the right to choose between these options. This service is subject to the following provisions:

- The product was used for its intended purpose as per the recommendations in the operating instructions.
- Neither the purchaser nor a third party has attempted to repair the product.

This manufacturer's warranty does not affect warranty entitlements against the dealer / retailer.

If problems arise with this product, please contact our Service department or send the defective product along with a brief description of the fault to GARDENA Manufacturing GmbH, making sure to have sufficiently covered any shipping costs and to have followed the relevant postage and packaging guidelines. A warranty claim must be accompanied by a copy of the proof of purchase.

Consumables :

Faults which occur as a result of incorrectly installed or leaking batteries are not covered by the guarantee.

Damage caused by frost is not covered by the warranty.

DE Produkthaftung

Wir weisen ausdrücklich darauf hin, dass wir in Übereinstimmung mit dem Produkthaftungsgesetz nicht für Schäden haften, die durch unsere Produkte entstehen, wenn diese unsachgemäß und nicht durch einen von uns autorisierten Servicepartner repariert wurden oder wenn keine Original GARDENA Teile oder von uns zugelassene Teile verwendet wurden.

EN Product Liability

In accordance with the German Product Liability Act, we hereby expressly declare that we accept no liability for damage incurred from our products where said products have not been properly repaired by a GARDENA-approved service partner or where original GARDENA parts or parts authorised by GARDENA were not used.

FR Responsabilité

Conformément à la loi relative à la responsabilité du fait des produits défectueux, nous déclarons expressément par la présente que nous déclinons toute responsabilité pour les dommages résultant de nos produits, si lesdits produits n'ont pas été correctement réparés par un partenaire d'entretien agréé GARDENA ou si des pièces d'origine GARDENA ou des pièces agréées GARDENA n'ont pas été utilisées.

NL Productaansprakelijkheid

Conform de Duitse wet inzake productaansprakelijkheid verklaren wij hierbij uitdrukkelijk dat wij geen aansprakelijkheid aanvaarden voor schade ontstaan uit onze producten waarbij deze producten niet zijn gerepareerd door een GARDENA-erkende servicepartner of waarbij geen originele GARDENA-onderdelen of onderdelen die door GARDENA zijn goedgekeurd zijn gebruikt.

IT Responsabilità del prodotto

In conformità con la Legge tedesca sulla responsabilità del prodotto, con la presente dichiariamo espressamente che decliniamo qualsiasi responsabilità per danni causati dai nostri prodotti qualora non siano stati correttamente riparati presso un partner di assistenza approvato GARDENA o laddove non siano stati utilizzati ricambi originali o autorizzati GARDENA.

ES Responsabilidad sobre el producto

De acuerdo con la Ley de responsabilidad sobre productos alemana, por la presente declaramos expresamente que no aceptamos ningún tipo de responsabilidad por los daños ocasionados por nuestros productos si dichos productos no han sido reparados por un socio de mantenimiento aprobado por GARDENA o si no se han utilizado piezas originales GARDENA o piezas autorizadas por GARDENA.

PT Responsabilidade pelo produto

De acordo com a lei alemã de responsabilidade pelo produto, declaramos que não nos responsabilizamos por danos causados pelos nossos produtos, caso os tais produtos não tenham sido devidamente reparados por um parceiro de assistência GARDENA aprovado ou se não tiverem sido utilizadas peças GARDENA originais ou peças autorizadas pela GARDENA.
