Reason: New 0,6mm Long Life Safety Blades for model year 2015

In order to further strengthen the high personal safety ambition of Gardena robotic lawnmowers, all robotic movers from year 2015 on will be equipped with Long Life Safety Blades. These new blades combines the high resilience (resistance to breakage when hitting a rock) of the 0.35 mm stainless steel blade with the wear resistance (long-lasting sharpness) of the new 0.60 mm material.

The previous 0,35 mm blades will be phased out !
