

SB: OGS and nozzles / sprayers / spray lances

Article: diverse

Reason: Information about the pressure resistance

1. Nozzles / sprayers / spray lances

At a water temperature of max. 40°C (temporary up to 60°C) the max. working pressure for GARDENA nozzles, sprayers and spray lances is **12 bar**.

2. OGS

When GARDENA garden hoses are used in combination with Original Gardena System parts and a water temperature of max. 40°C (temporary up to 60°C) the max . working pressure is **10 bar**. Provided that the connection hose / connector is duly installed.

3. These values are not valid for :

- GARDENA round tap connector (art. 2908)
- GARDENA adapter for indoor taps (art. 8187)
- GARDENA angled tap connector (art. 998)
- GARDENA spiral hose set (art 4647)
